Profile

I am a self-driven web developer with over one year of experience in front-end development. I love developing user-centric web applications that solve my needs and real-life challenges. Currently learning server-side technologies like Node.js and databases.

Projects

Auction Project

<https://auction-kappa.vercel.app/>

The auction project features product selling, a bidding system, a watchlist cart, email-based question communication, a landing preview page with category filtering, and a dynamic bidding process, view sold, won, and lost bid products and allows sellers to update product timelines and delete products if there are no user bids.

Tech stack - *React.js, Material Ui, Vite.js, Typescript, Tanstack/React Query, Express.js, Node.js, Prisma, MySQL*

Banking Landing Page

<https://banking-website-ten.vercel.app/>

The banking landing page provides a user dashboard, enhanced account security, access to community questions and answers, and seamless connectivity for user support. Currently not connected to the backend.

Tech stack - *Next.js, Typescript, Tailwindcss, Radix UI, Mantine UI, Tanstack/React Query*

Banking Dashboard (From Landing Page)

<agent-dashboard-dbcd.vercel.app>

The banking landing page provides a user dashboard, enhanced account security, access to community questions and answers, and seamless connectivity for user support. (Currently updating, and developing more features)

Tech stack - *Next.js, Typescript, Tailwindcss, Radix UI, Mantine UI, Shadcn UI, Tanstack/React Query*

Ecommerce mini shop

<stripe-sanity-ecommerce-xi.vercel.app>

The primary goal of this project is to provide users with a seamless experience where they can view products and make purchases using the Stripe payment gateway and using Sanity headless CMS.

Tech stack - *Next.js, CSS, Stripe, Sanity.io*
